COMPANY HISTORY

1980 - Initial Vision

Juan Rubio Aznar founded the company Ingerasp, S.L., dedicated to the manufacturing of technical components for footwear.

1995 – Innovation in Footwear Components

The company's R&D department developed Termocrep®, a proprietary technical material fully produced in-house, in collaboration with leading global footwear brands.

2010 – Technological Advancement with Termocrep-Gel®

Termocrep® evolved into Termocrep-Gel®, gaining national and international recognition for its unmatched flexibility, cushioning, and durability in the market.

2012 – From Components to Pharmaceuticals

Ingerasp, S.L. transitioned into a pharmaceutical laboratory and founded **Footgel World Laboratories**, becoming the first company in Europe to manufacture gel insoles with official European medical certification.

2015 – Birth of Footgel

The **Footgel** brand was launched to bring pharmaceutical expertise -focused on pain relief and prevention- into the industrial and sports sectors.

2020 – Footgel on the Global Stage

Footgel expanded internationally, establishing a presence across all four continents.

2024 – Innovation Integrated into Footwear with Footgel Technology®

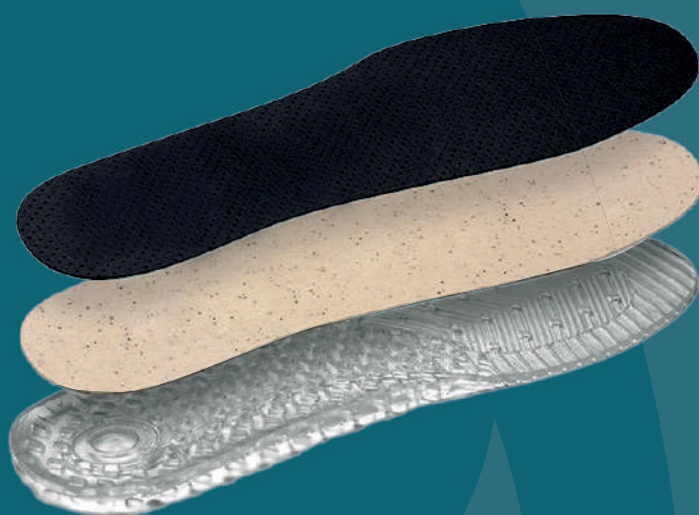

Footgel Technology® was officially registered, with the aim of integrating our proprietary technology directly into footwear. This innovation sets a new benchmark in comfort and shock absorption, redefining the standard for traditional insoles

¿WHY FOOTGEL?

TRIPLE-LAYER TECHNOLOGY

Antibacterial fabric + High-density foam + Termocrep Gel®

- ◀ Antibacterial fabric
- ◀ High-density foam
- ◀ Termocrep Gel®

We outperform conventional insoles
